

Dear Friends,

We are proud to announce our new **SnowWhite²** SLS 3D printer

SnowWhite² is an update of SnowWhite that in addition to having improvements in the management of the temperatures of the printing chamber, a new software interface, **has the peculiarity of being able to add the possibility of having the modified atmosphere in the construction chamber.**

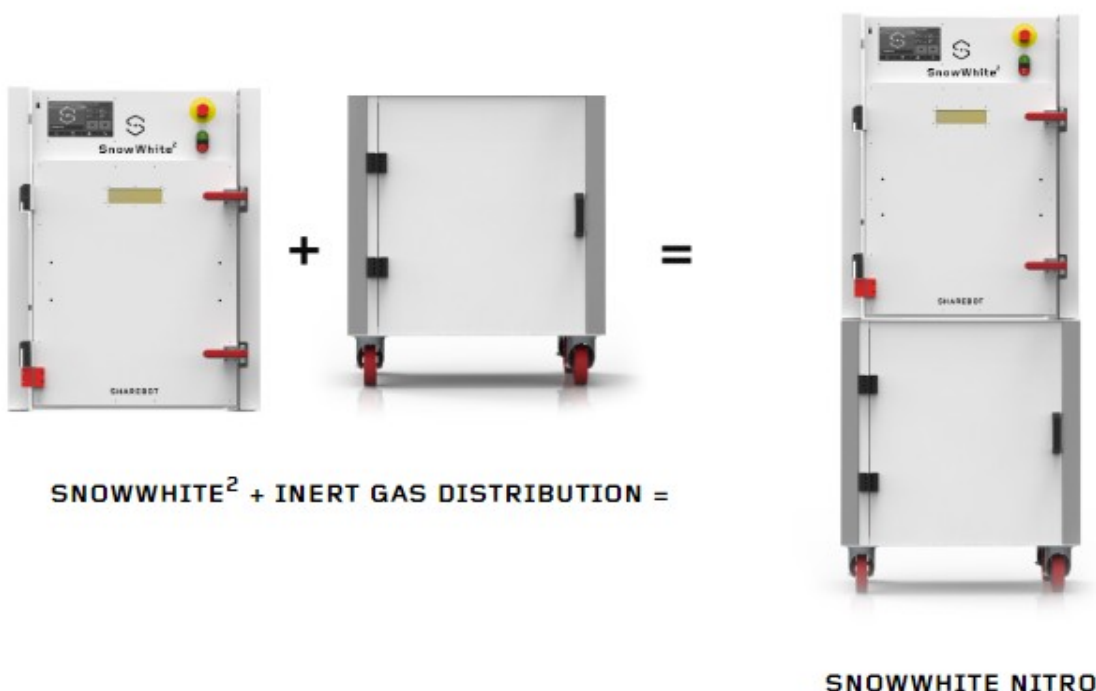

It can be supplied in a configuration without modified atmosphere (SnowWhite²) or with the addition of the modified atmosphere module (SnowWhite² NITRO)

The upgrade to SnowWhite² Nitro, to have the modified atmosphere in the printing chamber, can be done at any time on SnowWhite²

Pre-order start from today and the delivery will start from 1 October

We have a special discount for pre-order till 30/9 contact our marketing department for details, delivery time is now 60 days from order confirmation.
