

Sharebot.DE debuts at FabCon 3.D

Nibionno (Lecco) - 5.06.2015

May 28th Sharebot Sharebot.DE was presented at New FabLab Berlin. But the first official event of the new company is Erfurt **Fab-Con 3.D** faire from June 10th to 11th.

Sharebot.De aims to introduce the “Made in Italy” product in german small and medium-sized enterprises. The Sharebot 3D printers can be the **ideal tools for these companies to optimize and improve their workflow** with 3D printing technology.

FabCon 3.D

In 2013, FabCon 3.D became the **first trade fair in Germany to open up the world of 3D printing** to prosumers and semi-professional users.

On the exhibitor side, the event is aimed at suppliers and manufacturers of 3D printers, filament and 3D scanners, as well as 3D printing service providers. **It attracts visitors from a variety of different fields** including architects, fashion designers, artists, model builders, conservators, inventors and people working in the education sector.

FabCon 3.D has quickly established itself as an important platform for companies, start-ups and semi-professional users.

Held alongside the **world-class trade fair**, the 3D printing conference features a number of talks and presentations from renowned speakers from the fields of **science, start-ups, research and industry**.

Who

Sharebot.DE is a Sharebot, leading italian company in the production of 3D printers, initiative to create a reference point for 3D printing in Germany. Thanks to the partnership with DimensionAlley, the company activated an office in Berlin where it's possible to receive technical support and education in german about the using of this technolgy, allowing to SME to optimize and improve their workflow.
